Una vez que le llegue el mail,  
descargue la versión para su  
computador, la gran mayoría de  
computadores hoy en día tiene  
arquitecturas de 64 bits en sus  
CPU's.

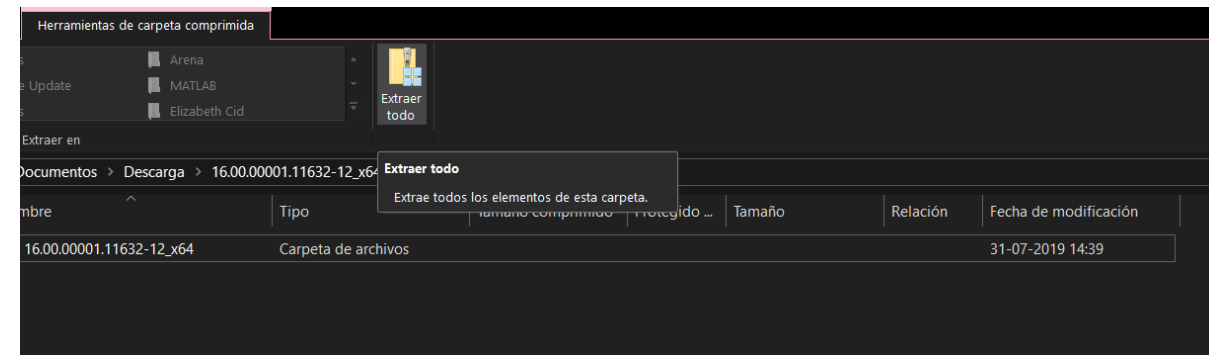

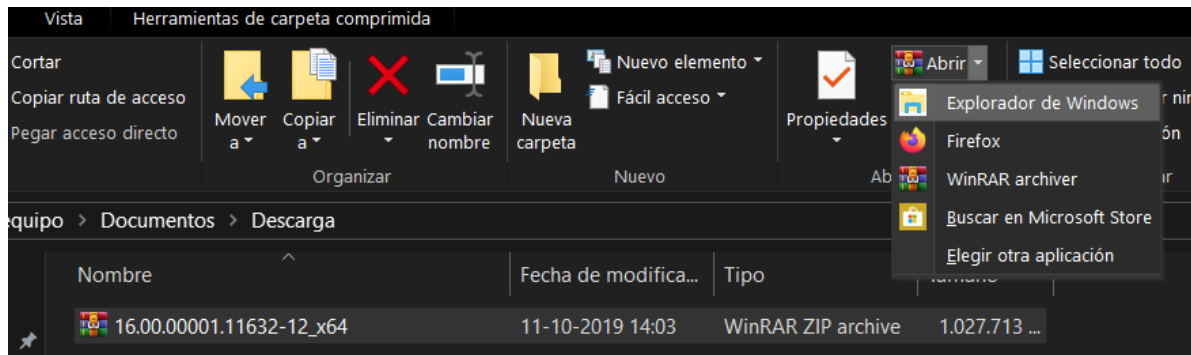

- Una vez apretado el link, comenzará automáticamente la descarga de un .zip con un peso aproximado de 1 gb.
- Para poder descomprimirlo tiene dos alternativas.

1) Si cuenta con WINRAR o un software parecido descomprima todo en una carpeta por defecto.

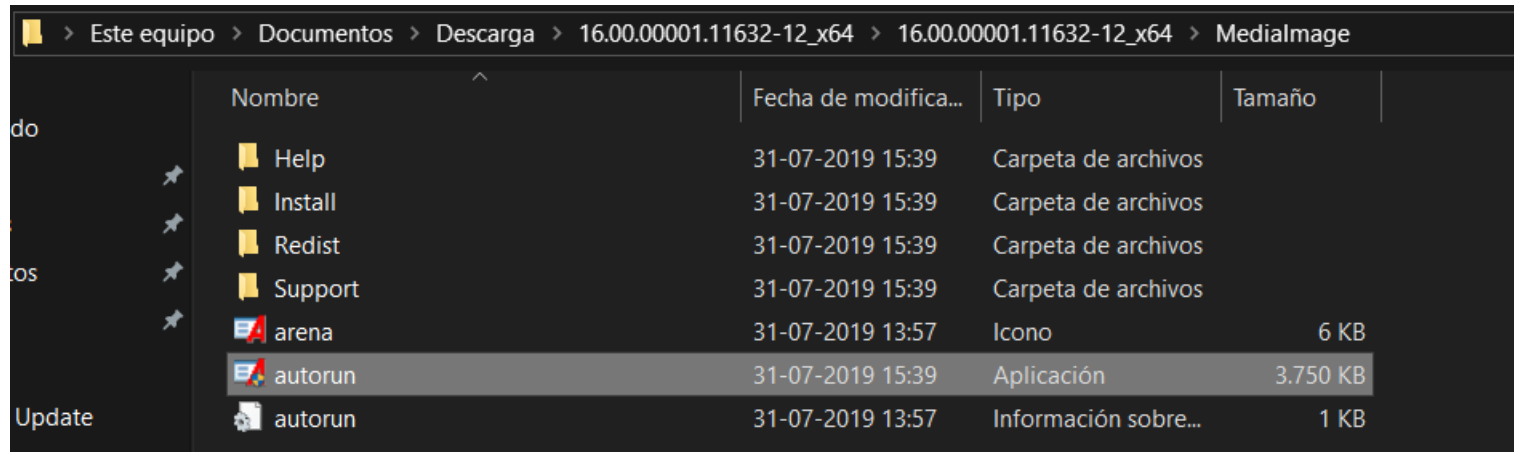

2) Si no cuenta con un Software para descomprimir, seleccione el archivo descargado y, en la barra de herramientas, seleccione Abrir, Explorador de Archivos.

Posteriormente, en la nueva ventana, seleccione Extraer Todo, Extraer.

- Una vez descomprimido el archivo, abrir la nueva carpeta creada, Medialmage, autorun.

Posterior a esto, seguir el proceso estándar de instalación.

**Importante!** En el apartado en donde solicite la licencia de Arena, leer en detalle el recuadro, aparecerán las instrucciones para saber qué poner si es una licencia de estudiante (creo que era STUDENT, sin embargo lean con detalle.)
